

# Sharni K Wigs Aftercare Guide

Thank you for choosing Sharni K Wigs, where we pride ourselves on providing the highest quality wigs with luxury Swiss lace and the finest raw Brazilian ponytail hair. To ensure that your wig or topper stays beautiful and lasts, follow these detailed aftercare instructions:

## 1. Shampooing and Conditioning:

- Use only the shampoo and conditioner recommended for your wig type. Regular hair products may contain harsh chemicals that can damage the delicate Swiss lace and hair.
- Start by wetting the wig with lukewarm water. Gently lather the shampoo in your hands and apply it to the hair in a downward motion, from roots to ends. Avoid scrubbing or rubbing in circular motions, as this may cause tangling.
- Rinse the shampoo thoroughly with lukewarm water, again moving in the direction of the hair. Repeat twice.
- Apply conditioner from the mid-lengths to the ends of the hair. Avoid applying conditioner to the roots or the lace area, as this can weaken the knots and lead to shedding.
- Allow the conditioner to sit for a few minutes before rinsing it out with cool water.

## 2. Moisturizing and Treatment:

- To keep the wig hair healthy and soft, use a professional oil or leave-in conditioner on a regular basis. Apply a small amount to the hair strands, avoiding the lace and cap.
- If you want to use hair treatments, focus them on the mid-lengths and ends of the hair only. Avoid applying treatments to the roots, as this can weaken the knots holding the hair in place.
- Never leave treatments on the wig overnight, as excessive exposure to products can damage the hair and lace.

## 3. Styling and Heat Protection:

- Before using any heat styling tools (e.g., flat irons, curling irons), apply a heat protectant spray to the hair to prevent heat damage.
- While it's possible to style your wig using heat, excessive use of heat styling tools can reduce the lifespan of the hair. Limit heat styling to only when necessary.

## 4. Brushing and Drying:

- Use a wide-toothed comb or a Tangle Angel brush to detangle the wig gently. Start at the tips and work your way up to the roots, being careful not to pull too hard.
- When blow-drying the wig, use a natural bristle brush to minimize damage and maintain the hair's softness.
- To air dry the wig, place it on a wig stand, not made of canvas, to preserve its shape. Avoid using solid heads, as they may stretch the cap.

## 5. Night-Time Care:

- Store your wig on a wig stand at night to prevent tangling and maintain its style.
- Before placing the wig on the stand, lightly apply professional hair oil to the hair strands, focusing on the mid-lengths and ends.
- When brushing the wig in the morning, use a Tangle Angel brush to remove any tangles or knots gently.

## 6. Lace Care:

- Avoid touching or handling the wig by the lace area, as it is delicate and can tear easily.
- When washing the wig, use one hand to hold the inside structure of the wig cap and rest the lace on your wrist. This protects the lace while you rinse it with warm water.
- Gently cleanse the hair using your fingers, moving in the direction of the hair. Avoid using circular motions that could cause tangling.

## 7. Avoid Using Glue:

- Never use glue directly on the wig or the lace. Use wig tape or a velvet headband.

By following these detailed aftercare instructions, your Sharni K Wig or Topper will continue to look beautiful, feel soft, and maintain its durability for many years to come. If you have any questions or concerns about caring for your wig, please don't hesitate to contact us. Thank you for being a part of the Sharni K Wigs family!
